

# CONSTRUCTION TECHNOLOGY ADVISORY PRACTICE

Many technology solutions and innovations applied to the CapEx built environment have not been sufficiently tested for scale, complexity, and reliability.

BRG's Construction Technology Advisory Practice (CTAP) advises clients committed to fulfilling their technology-based investment strategies in support of their mission to compete with lower risks and costs at targeted profit. Our professionals possess project forensics and dispute resolution expertise to advise on strategies to mitigate risks and achieve measurable and sustainable positive outcomes.

The CTAP team offers the opportunity to unlock the potential value in being an early adopter of new technologies to achieve realistic outcomes and streamlined transformation. We work closely with clients to leverage existing core competencies in feasible directions, while integrating established and emerging capabilities in a strategic manner. The results include measured ROI, enhanced collaboration, and leaner cost and schedule performance.

Our approach involves three components: *Strategy, Management, and Domain Expertise.*

INTELLIGENCE THAT WORKS

STRATEGY	MANAGEMENT	DOMAIN EXPERTISE
<ul style="list-style-type: none"><li>- Readiness assessments</li><li>- Technology roadmapping</li><li>- Implementation guides</li></ul>	<ul style="list-style-type: none"><li>- Task force facilitation</li><li>- Pilot programs</li><li>- Progress briefings/workshops</li></ul>	<ul style="list-style-type: none"><li>- Performance tracking</li><li>- Surveying</li><li>- ROI analysis</li></ul>

*Smart investments in and adoption of proven technology can result in sustained business acceleration and yield great rewards for CapEx developers.*
