

# EXECUTIVE ROUNDTABLE LUNCHEON

Topics discussed included the role and responsibilities of the Texas Railroad Commission, Texas' role as a national energy leader, and workforce and economic development.

On Thursday, April 27, BRG's Houston office hosted an Executive Roundtable Luncheon featuring Chairman Christi Craddick. Senior executives and business leaders representing oil and gas, utilities, accounting, advisory, energy, government, and legal sectors attended the interactive session.

The roundtable allowed participants an opportunity to engage in an interactive dialogue with the chairman and network with their peers. The Railroad Commission's role in ensuring that the state's energy industry remains strong is more important today than ever before. The challenges associated with a dynamic industry are complex and require thoughtful, reasonable leadership, as evident from the survey results. As Chairman of the Railroad Commission, Christi Craddick continues to address these critical issues.
